RESEARCH CV **OIST Research Internship**

基本情報 / Personal Information

Name	Biswajeet Tarasia	Furigana	Biswajeet Tarasia
Date of Birth	27 DECEMBER 2004	Nationality	Indian
Current Address	Durg, Chhattisgarh, India	Phone	+91 8260988838
Email	biswajeettarasia88@gmail.com	Portfolio	biswajeettarasia88-byte.github.io/biswajeet-portfolio

学歴 / Education

Period	Institution and Qualification
Aug 2024 – Jul 2028 (Expected)	**Chhattisgarh Swami Vivekanand Technical University (CSVTU)** B.Tech in Computer Science and Engineering, specialization in Artificial Intelligence and Machine Learning. Semester SPI: Sem 1 – 8.46; Sem 2 – 9.42; Sem 3 – 8.76; Sem 4 – 8.95.
Graduated 2022	**Kendriya Vidyalaya, India** Higher Secondary Education (PCMB: Physics, Chemistry, Mathematics and Biology); 88%.

研究・職歴・インターンシップ / Research & Internship Experience

Research Intern – LINGO Research Group, IIT Gandhinagar *May–July 2026*

- Worked on multimodal data annotation processing and quality evaluation for Vision Language Models (VLMs).
- Contributed to scalable data-processing pipelines, model experiments, and evaluation workflows.
- Supported annotation workflow benchmarking to improve dataset reliability for AI and NLP research.

Research Project – SheSafe-Bench *2026–Present*

Multilingual NLP, LLM Evaluation, AI Safety

- Developed research on evaluating language models for women-directed harassment across multilingual and code-mixed Asian language contexts.
- The submitted benchmark contains 8,221 comments across eight language pairs, with six annotation categories.
- The reported annotation agreement is Cohen's $\kappa = 0.451$. The evaluation setup compares a character n-gram TF-IDF and Logistic Regression baseline with three closed-weight LLMs in a zero-shot setting.
- Submitted to ACL Rolling Review (ARR), October 2026; Submission ID: 9216. Review outcome pending.

Team Contributor – Swarna Drone Technology *2025–2026*

- Contributed to AI-related software and intelligent control modules for autonomous drone operations. The referenced embedded-AI work was at the proposal stage.

研究論文 / Research Paper Submission

SheSafe-Bench: A Multilingual and Code-Mixed Benchmark for Women-Directed Harassment

- Venue: ACL Rolling Review (ARR), October 2026.
- Submission ID: 9216.
- Status: Submitted; review outcome pending.
- Dataset: 8,221 comments across Hindi-English, Urdu-English, Bengali-English, Gujarati-English, Marathi-English, Odia-English, Tamil-English, and Nepali-English language pairs.
- Methods: TF-IDF with Logistic Regression and zero-shot evaluation using three closed-weight LLMs.
- Submission: OpenReview submission page.

研究活動・プロジェクト / Selected Projects

Phishing Detection and URL Risk Scoring *2025*

Python, Machine Learning, OSINT

Developed a machine-learning approach to phishing URL detection using lexical, domain-related, and OSINT features with a risk-scoring pipeline.

Rural Development – Offline AI Learning Platform *2025*

Python, NLP

Designed an offline-oriented educational platform concept for rural schools with limited internet connectivity, emphasizing modular logic and input validation.

Intelligent Context-Aware Chatbot *2025*

Python, Streamlit, LangChain

Built a chatbot prototype with local-LLM integration, persistent memory, context tracking, and an interactive UI.

DebugForge – AI Code Debugging Application *2025*

MERN Stack, OpenAI API

Developed a full-stack AI application that analyzes programming errors and generates structured fixes with explanations.

スキル / Technical Skills

Category	Skills
Programming	Python, SQL, JavaScript, HTML, CSS
AI / ML	PyTorch, Hugging Face Transformers, data analysis, pattern recognition, NLP
Web Development	React.js, Bootstrap, MERN stack
Tools	Git, GitHub, VS Code, Jupyter Notebook
Research	Dataset curation, annotation workflows, model benchmarking, evaluation metrics, error analysis
Research Interests	Multilingual NLP, code-mixed language processing, multimodal AI, LLM evaluation, AI safety

資格 / Certifications

- Oracle AI Foundations Associate – Oracle, 2025.
- AI Skills Passport – EY and Microsoft.
- Data Engineering Internship – AWS program.
- Python Full Stack Internship – EduSkills.
- MERN Full Stack – Coding Spoon, 2026.
- Microsoft Office – Infosys Springboard, 2025.

受賞・活動 / Achievements & Activities

- **Special Track Winner** – MLH and GitHub Hackathon, April 2026.
- **Open Source Contributor** – OSCG'26, March 2026.
- Hackathon Participant – IIT Bhilai, March 2026.
- NASA Space Apps Challenge Participant, 2025.
- Smart India Hackathon Participant, 2025.

志望動機 / Motivation for OIST

My research interests lie at the intersection of machine learning, multilingual language technologies, and reliable AI evaluation. During my internship with the LINGO Research Group at IIT Gandhinagar, I worked on multimodal data annotation and quality evaluation for Vision Language Models.

I am also working on SheSafe-Bench, a multilingual and code-mixed benchmark submitted to ACL Rolling Review in October 2026. This work has strengthened my interest in dataset quality, evaluation methodology, and the limitations
