Biswajeet Tarasia

Computer Science Engineering Student – AI & ML

LinkedIn GitHub YouTube Medium biswajeettarasia88@gmail.com

Education

Chhattisgarh Swami Vivekanand Technical University Aug 2024 – Jul 2028
B.Tech in Computer Science Engineering, AI & ML *Durg, Chhattisgarh*
– SPI: Sem 1 – 8.46 | Sem 2 – 9.42 | Sem 3 – 8.76

Kendriya Vidyalaya Graduated 2022
Higher Secondary Education, PCMB – 88% *India*

Experience

Indian Institute of Technology Gandhinagar May 2026 – Jul 2026
Research Intern – LINGO Research Group | Vision Language Models, Data Annotation *Online*
– Selected as Research Intern under Dr. Mayank Singh (Associate Professor, CSE) at IIT Gandhinagar's LINGO Research Group.
– Working on multimodal data annotation processing and quality evaluation for Vision Language Models (VLMs).
– Designing and developing scalable data pipelines; conducting experiments and evaluating state-of-the-art AI models including VLMs.
– Implementing and benchmarking large-scale annotation workflows to improve dataset reliability for NLP research.

Research Paper (In Progress) 2026 – Present
Benchmarking Large Language Models on Sexual Harassment Detection | NLP, LLMs, Safety
– Conducting a comprehensive benchmark study evaluating LLM performance on detecting sexual harassment in text.
– Designing evaluation metrics and curating annotated datasets to assess model accuracy, fairness, and robustness across multiple LLMs.
– Analyzing failure modes and bias patterns in state-of-the-art models to propose guidelines for safer AI deployment.

Swarna Drone Technology 2025 – 2026
Team Contributor / AI & Software Integration, Drone Systems
– Collaborated on AI-driven software and intelligent control modules for autonomous drone operations; assisted embedded AI testing(Proposal only).

Technical Skills

Languages: Python, SQL, JavaScript, HTML, CSS **Frontend:** React.js, Bootstrap, Responsive Web Design
AI & ML: PyTorch, HuggingFace Transformers, Data Analysis, Pattern Recognition
Tools: Git, GitHub, VS Code, Jupyter Notebook **Strengths:** Problem Solving, Team Collaboration

Projects

Rural Development | *Python, NLP* 2025
– Offline AI learning platform for rural schools with no internet; modular logic and input validation for reliability.

Phishing Detection & URL Risk Scoring | *Python, ML, OSINT* 2025
– ML system detecting phishing URLs via lexical, domain, and OSINT features with real-time risk scoring pipeline.

Intelligent Context-Aware Chatbot | *Python, Streamlit, LangChain* 2025
– Stateful chatbot with local LLM, persistent memory, context tracking, and real-time Streamlit UI.

DebugForge | *MERN, OpenAI API* 2025
– Full-stack AI app that analyzes code errors and returns structured fixes with explanations.

Certifications

Oracle AI Foundations Associate | Oracle – 2025
Data Engineering Internship | AWS
Python Full Stack Internship | EduSkills
AI Skills Passport | EY & Microsoft
MERN Full Stack | Coding Spoon – 2026
Microsoft Office | Infosys – 2025

Achievements & Activities

Special Track Winner – MLH & GitHub Hackathon Apr 2026
Open Source Contributor – OSCG'26 Mar 2026
Hackathon Participation – IIT Bhilai Mar 2026
NASA Space Apps Challenge Participant | Global open-data innovation challenge 2025
Smart India Hackathon Participant | National-level government technology challenge 2025
